

# Aldafermin Biosimilar - Research Grade

**Product Code:** ICH5334

**More Information**

**Species Reactivity:** Human

**Target:** FGFR4<sup>1/2</sup>

**Concentration:** 5mg/ml

**Host:** CHO Cells

**product name H2:** Aldafermin Biosimilar - Research Grade

**Sequence:** <https://www.imgt.org/mAb-DB/>

**Buffer:** ICH3002

**UniProt:** P22455

**Shipping Conditions:** Blue ice

**background:** FGF19 signalling through FGFR4 regulates bile acid synthesis and hepatic metabolism and is a focus of liver disease and metabolic research. This research-grade recombinant protein is a non-therapeutic analog of aldafermin, an engineered FGF19 variant, supplied strictly for research use only (RUO). Manufactured to demanding in vivo standards and purified to a low-endotoxin grade, it is offered in scalable milligram (mg) to gram (g) quantities for high-throughput and heavy-usage laboratories. It is suited to receptor-signalling assays, in vitro metabolic screening, and in vivo models of liver and metabolic disease, delivering reproducible, lot-consistent performance.

**Purification Method:** This monoclonal antibody was purified using Protein A

**Formulation:** Sterile, preservative-free, solution in PBS. BSA and Azide free.

**Purity:** >90% by SDS-PAGE

**Endotoxin:** ≤ 1.0 EU/mg as determined by the LAL method

**Storage:** This biosimilar is stable when stored at 2-8°C. For longer term storage (> 3 months) it is recommended to store this antibody at -20°C or -70°C.

**Applications:** Functional Assays

**Application Notes:** This biosimilar is for research use only (RUO): it is not for diagnostic or therapeutic procedures and cannot be purchased by patients.

**Use:** Products are for research use only. Not for use in diagnostic or therapeutic procedures.

**Delivery Time:** 3-4 weeks
