

Anti-Human CTLA4 (IB8) Antibody

Product Code: ICH4025A-0.1mg

More Information

Species Reactivity: Human

Target: CTLA-4

Concentration: 1.0 - 5.0 mg/ml

Isotype: Human IgG1 Kappa

Host: Humanized

Size: 0.1mg

UniProt: P16410

Shipping Conditions: Blue ice

background: CTLA-4 is an inhibitory checkpoint receptor that competes with CD28 to limit early T-cell activation and is a foundational target in cancer immunology research. Clone IB8 is a human IgG1-kappa monoclonal antibody directed against human CTLA-4, suited to checkpoint-blockade and T-cell activation studies. Anti-CTLA-4 clone IB8 is supplied in a low-endotoxin format suitable for in vivo use and produced in scalable milligram to gram quantities for bulk and high-throughput laboratories. With dependable lot-to-lot consistency, IB8 is a robust reagent for tumour immunology and preclinical checkpoint research. It is a non-therapeutic product intended strictly for research use only.

Other names: CtlA4, Cytotoxic T-lymphocyte protein 4, CD152

clone: IB8

Specificity: Detects human CTLA-4.

Purification Method: This monoclonal antibody was purified using multi-step affinity chromatography methods such as Protein A or G depending on the species and isotype.

Formulation: Phosphate buffered saline (PBS) pH 7.2, with no carrier protein, potassium or preservatives added. BSA and Azide free.

Purity: >95% by SDS-PAGE and HPLC

Endotoxin: ≤ 1.0 EU/mg as determined by the LAL method

Storage: Stable for at least one week when stored sterile at 2-8°C. For long term storage aseptically aliquot in working volumes without diluting and store at -20°C or -80°C. Avoid Repeated Freeze Thaw Cycles.

Application Notes: This antibody is for research use only (RUO): it is not for diagnostic or therapeutic procedures and cannot be purchased by patients.

Use: Products are for research use only. Not for use in diagnostic or therapeutic procedures.
