

Bulk Anti-Chikungunya E2 Protein (CHK152) Antibody

Product Code: ICH1242

More Information

Species Reactivity: Chikungunya virus

Target: Chikungunya, E2

Concentration: >5mg/ml

Isotype: Mouse IgG2a Kappa

Host: Mouse

product name H2: Bulk Anti-Chikungunya E2 Protein (CHK152) Antibody

Shipping Conditions: Blue ice

background: The Chikungunya virus E2 glycoprotein mediates receptor binding and cell entry and is a major target of protective antibody responses against the alphavirus. Clone CHK152 is a mouse IgG2a kappa monoclonal antibody recognising CHIKV E2, validated for ELISA, IHC, neutralization, and in vivo studies. Anti-Chikungunya E2 CHK152 is supplied in a low-endotoxin format suitable for in vivo use and produced in scalable milligram to gram quantities for bulk and high-throughput laboratories. This non-therapeutic reagent, for research use only, delivers reproducible lot-to-lot performance for alphavirus virology, neutralization, and infection-model research.

Other names: CHIKV, Chikungunya virus, VLPs, Chikungunya virus-like particles

clone: CHK152

Purification Method: Protein A

Formulation: This monoclonal antibody is aseptically packaged and formulated in 0.01 M phosphate buffered saline (150 mM NaCl) PBS pH 7.2 - 7.4 with no carrier protein,

potassium, calcium or preservatives added.

Purity: $\geq 95\%$ monomer by analytical SEC_ $> 95\%$ by SDS Page

Endotoxin: 1.0 EU/mg as determined by the LAL method

Storage: Functional grade preclinical antibodies may be stored sterile as received at 2-8°C for up to one month. For longer term storage, aseptically aliquot in working volumes without diluting and store at $\leq -70^\circ\text{C}$. Avoid Repeated Freeze Thaw Cycles.

Applications: ELISA, IHC, in vivo, N

Use: Products are for research use only. Not for use in diagnostic or therapeutic procedures.
