

Davutamig Biosimilar - Research Grade

Product Code: ICH5468

More Information

Species Reactivity: Human

Target: MET $\frac{1}{2}$

Concentration: 5mg/ml

Isotype: IgG4 - kappa

Host: CHO Cells

product name H2: Davutamig Biosimilar - Research Grade

Sequence: <https://www.imgt.org/mAb-DB/>

Buffer: ICH3002

UniProt: P08581

Shipping Conditions: Blue ice

background: The hepatocyte growth factor receptor MET is a receptor tyrosine kinase that drives proliferation, motility and invasion and is a validated target in oncology research. This product is an unconjugated, non-therapeutic analog of davutamig, a human IgG4-kappa recombinant antibody for research use only. It is supplied with low endotoxin to in vivo-grade standards and produced in scalable milligram-to-gram quantities for high-throughput laboratories. Applications include functional and receptor-blockade assays, MET-signaling studies, in vitro screening, ADC development reference work and preclinical tumor models examining MET activity. The ultra-pure, low-endotoxin material is offered at milligram-to-gram scale, giving high-throughput labs consistent performance across every lot.

Purification Method: This monoclonal antibody was purified using Protein A

Formulation: Sterile, preservative-free, solution in PBS. BSA and Azide free.

2026

Purity: >90% by SDS-PAGE

Endotoxin: ≤ 1.0 EU/mg as determined by the LAL method

Storage: This biosimilar is stable when stored at 2-8°C. For longer term storage (> 3 months) it is recommended to store this antibody at -20°C or -70°C.

Applications: Functional Assays

Application Notes: This biosimilar is for research use only (RUO): it is not for diagnostic or therapeutic procedures and cannot be purchased by patients.

Use: Products are for research use only. Not for use in diagnostic or therapeutic procedures.

Delivery Time: 3-4 weeks
