

Divozilimab Biosimilar - Research Grade

Product Code: ICH5483

More Information

Species Reactivity: Human

Target: MS4A1 α

Concentration: 5mg/ml

Isotype: IgG1 - kappa

Host: CHO Cells

product name H2: Divozilimab Biosimilar - Research Grade

Sequence: <https://www.imgt.org/mAb-DB/>

Buffer: ICH3002

UniProt: P11836

Shipping Conditions: Blue ice

background: A cornerstone target across lymphoma and autoimmunity research, MS4A1 (CD20) is a B-cell-surface protein integral to B-lymphocyte biology. As an unconjugated, non-therapeutic analog of divozilimab, this human IgG1-kappa recombinant antibody is supplied for research use only. It is formulated low in endotoxin to in vivo standards and manufactured in scalable milligram-to-gram quantities for high-throughput laboratories. Researchers apply it to functional assays, B-cell depletion and ADCC studies, in vitro screening and preclinical models that investigate CD20-directed approaches, with consistent performance over time. Built for in vivo use with low endotoxin and scalable milligram-to-gram supply, it remains a reliable choice for bulk research applications.

Purification Method: This monoclonal antibody was purified using Protein A

Formulation: Sterile, preservative-free, solution in PBS. BSA and Azide free.

Purity: >90% by SDS-PAGE

Endotoxin: ≤ 1.0 EU/mg as determined by the LAL method

Storage: This biosimilar is stable when stored at 2-8°C. For longer term storage (> 3 months) it is recommended to store this antibody at -20°C or -70°C.

Applications: Functional Assays

Application Notes: This biosimilar is for research use only (RUO): it is not for diagnostic or therapeutic procedures and cannot be purchased by patients.

Use: Products are for research use only. Not for use in diagnostic or therapeutic procedures.

Delivery Time: 3-4 weeks
