

# Elezanumab Biosimilar - Research Grade

**Product Code:** ICH5512

**More Information**

**Species Reactivity:** Human

**Target:** RGMA $\alpha$  $\frac{1}{2}$

**Concentration:** 5mg/ml

**Isotype:** IgG1 - lambda2

**Host:** CHO Cells

**product name H2:** Elezanumab Biosimilar - Research Grade

**Sequence:** <https://www.imgt.org/mAb-DB/>

**Buffer:** ICH3002

**UniProt:** Q96B86

**Shipping Conditions:** Blue ice

**background:** Repulsive guidance molecule A (RGMA) restrains axon growth and neural repair, positioning it as a target of interest across neurodegeneration and CNS injury research. Our anti-human RGMA recombinant monoclonal antibody is an unconjugated, non-therapeutic analog of elezanumab, distributed for research use only (RUO). Crafted to rigorous in vivo standards, this ultra-pure, low-endotoxin material is available in scalable milligram (mg) to gram (g) quantities to serve heavy-usage, high-throughput laboratories. It serves as a dependable control and neutralizing reagent for in vitro neurite-outgrowth screening, axon-guidance studies, and in vivo models of neural injury and remyelination.

**Purification Method:** This monoclonal antibody was purified using Protein A

**Formulation:** Sterile, preservative-free, solution in PBS. BSA and Azide free.

**Purity:** >90% by SDS-PAGE

**Endotoxin:**  $\leq 1.0$  EU/mg as determined by the LAL method

**Storage:** This biosimilar is stable when stored at 2-8°C. For longer term storage (> 3 months) it is recommended to store this antibody at -20°C or -70°C.

**Applications:** Functional Assays

**Application Notes:** This biosimilar is for research use only (RUO): it is not for diagnostic or therapeutic procedures and cannot be purchased by patients.

**Use:** Products are for research use only. Not for use in diagnostic or therapeutic procedures.

**Delivery Time:** 3-4 weeks
