

Faralimomab Biosimilar - Research Grade

Product Code: ICH5543

More Information

Species Reactivity: Human

Target: IFN α 1 β

Concentration: 5mg/ml

Isotype: IgG1 - nd

Host: CHO Cells

product name H2: Faralimomab Biosimilar - Research Grade

Sequence: <https://www.imgt.org/mAb-DB/>

Buffer: ICH3002

UniProt: P0DY56

Shipping Conditions: Blue ice

background: Interferon alpha (IFN-alpha) is a type I interferon central to antiviral defense and to the immune dysregulation seen in lupus and other autoimmune conditions. This research-grade anti-IFN-alpha recombinant monoclonal antibody is an unconjugated, non-therapeutic analog of faralimomab, intended strictly for research use only (RUO). Produced to stringent in vivo standards, the ultra-pure, low-endotoxin preparation is offered in scalable milligram (mg) to gram (g) quantities to supply heavy-usage, high-throughput laboratories. It functions as a reliable cytokine-neutralizing reagent and control for in vitro signaling studies, in vivo autoimmune disease models, and biologics characterization workflows.

Purification Method: This monoclonal antibody was purified using Protein A

Formulation: Sterile, preservative-free, solution in PBS. BSA and Azide free.

Purity: >90% by SDS-PAGE

Endotoxin: ≤ 1.0 EU/mg as determined by the LAL method

Storage: This biosimilar is stable when stored at 2-8°C. For longer term storage (> 3 months) it is recommended to store this antibody at -20°C or -70°C.

Applications: Functional Assays

Application Notes: This biosimilar is for research use only (RUO): it is not for diagnostic or therapeutic procedures and cannot be purchased by patients.

Use: Products are for research use only. Not for use in diagnostic or therapeutic procedures.

Delivery Time: 3-4 weeks
