

Human IgG1 Kappa Isotype Control - Deruxtecan DAR8

Product Code: ICH2254-D8

More Information

Species Reactivity: Human

Target: Hen Egg Lysozyme

Isotype: Human IgG1

product name H2: Human IgG1 Kappa Isotype Control - Deruxtecan DAR8

Buffer: ICH3001

Shipping Conditions: Blue ice

background: Interpreting antibody-drug-conjugate experiments requires a payload-matched control that carries no target specificity. Raised against hen egg lysozyme, an antigen not present in mammalian tissues, this human IgG1 kappa isotype control delivers no on-target binding and functions as a dependable negative reference. It is conjugated with deruxtecan at a drug-to-antibody ratio of 8 (DAR8), enabling researchers to isolate the contributions of payload and high-DAR loading from antigen-driven effects when establishing background and gating. The reagent is research use only, supplied in a low-endotoxin format suitable for in vivo use and manufactured in scalable milligram (mg) to gram (g) quantities for heavy-usage and high-throughput ADC studies.

Formulation: PBS, pH 7.4, Contains no stabilizers or preservatives. 0.2 μ M filtered

Purity: >95% Determined by SDS-PAGE

Endotoxin: 1EU/mg Determined by LAL gel clotting assay

Storage: The product should be stored in the original stock concentration at 4°C. Avoid freeze / thaw cycles.

Use: Research Use Only. Not for Therapeutic or Diagnostic Use
