

Ifabotuzumab Biosimilar - Research Grade

Product Code: ICH5591

More Information

Species Reactivity: Human

Target: EPHA3

Concentration: 5mg/ml

Isotype: IgG1 - kappa

Host: CHO Cells

product name H2: Ifabotuzumab Biosimilar - Research Grade

Sequence: <https://www.imgt.org/mAb-DB/>

Buffer: ICH3002

UniProt: P29320

Shipping Conditions: Blue ice

background: EphA3, encoded by EPHA3, is a receptor tyrosine kinase aberrantly expressed in solid tumors and the leukemic microenvironment, making it a target of interest in oncology research. This research-grade anti-EphA3 recombinant monoclonal antibody is an unconjugated, non-therapeutic analog of ifabotuzumab, supplied for research use only (RUO). Manufactured to demanding in vivo standards, the ultra-pure, low-endotoxin material is available in scalable milligram (mg) to gram (g) quantities to support heavy-usage, high-throughput laboratories. It serves receptor-binding and signalling studies, ADCC and ADC development assays, in vitro screening, and in vivo tumor models.

Purification Method: This monoclonal antibody was purified using Protein A

Formulation: Sterile, preservative-free, solution in PBS. BSA and Azide free.

2026

Purity: >90% by SDS-PAGE

Endotoxin: ≤ 1.0 EU/mg as determined by the LAL method

Storage: This biosimilar is stable when stored at 2-8°C. For longer term storage (> 3 months) it is recommended to store this antibody at -20°C or -70°C.

Applications: Functional Assays

Application Notes: This biosimilar is for research use only (RUO): it is not for diagnostic or therapeutic procedures and cannot be purchased by patients.

Use: Products are for research use only. Not for use in diagnostic or therapeutic procedures.

Delivery Time: 3-4 weeks
