

Imalumab Biosimilar - Research Grade

Product Code: ICH5595

More Information

Species Reactivity: Human

Target: MIF α β

Concentration: 5mg/ml

Isotype: IgG1 - kappa

Host: CHO Cells

product name H2: Imalumab Biosimilar - Research Grade

Sequence: <https://www.imgt.org/mAb-DB/>

Buffer: ICH3002

UniProt: P14174

Shipping Conditions: Blue ice

background: Macrophage migration inhibitory factor (MIF) is a pleiotropic pro-inflammatory cytokine implicated in inflammation, autoimmunity, and tumor progression, making it a broad target in immunology research. This research-grade anti-MIF recombinant monoclonal antibody is an unconjugated, non-therapeutic analog of imalumab, intended strictly for research use only (RUO). Built to demanding in vivo standards, the ultra-pure, low-endotoxin formulation ships in scalable milligram (mg) to gram (g) quantities to support high-throughput and heavy-usage laboratories. It serves cytokine neutralization and blocking assays, binding characterization, in vitro screening, control reagent use, and in vivo inflammation models.

Purification Method: This monoclonal antibody was purified using Protein A

Formulation: Sterile, preservative-free, solution in PBS. BSA and Azide free.

Purity: >90% by SDS-PAGE

Endotoxin: ≤ 1.0 EU/mg as determined by the LAL method

Storage: This biosimilar is stable when stored at 2-8°C. For longer term storage (> 3 months) it is recommended to store this antibody at -20°C or -70°C.

Applications: Functional Assays

Application Notes: This biosimilar is for research use only (RUO): it is not for diagnostic or therapeutic procedures and cannot be purchased by patients.

Use: Products are for research use only. Not for use in diagnostic or therapeutic procedures.

Delivery Time: 3-4 weeks
