

Pelgifatamab Biosimilar - Research Grade

Product Code: ICH5766

More Information

Species Reactivity: Human

Target: FOLH1

Concentration: 5mg/ml

Isotype: IgG1 - kappa

Host: CHO Cells

product name H2: Pelgifatamab Biosimilar - Research Grade

Sequence: <https://www.imgt.org/mAb-DB/>

Buffer: ICH3002

UniProt: Q04609

Shipping Conditions: Blue ice

background: FOLH1 (PSMA) is a prostate-enriched cell-surface enzyme and a heavily targeted antigen in oncology research. This recombinant human IgG1 kappa antibody is an unconjugated, non-therapeutic analog of pelgifatamab, generated in CHO cells against human FOLH1. Released for research use only, it is delivered in a low-endotoxin format suited to in vivo studies and produced in scalable milligram (mg) to gram (g) lots for bulk, high-throughput laboratories. It is appropriate for antigen-expression profiling, functional binding assays, in vitro screening, in vivo tumor models, and antibody-drug conjugate development. Its reproducible quality supports demanding workflows that consume reagent at scale.

Purification Method: This monoclonal antibody was purified using Protein A

Formulation: Sterile, preservative-free, solution in PBS. BSA and Azide free.

Purity: >90% by SDS-PAGE

Endotoxin: ≤ 1.0 EU/mg as determined by the LAL method

Storage: This biosimilar is stable when stored at 2-8°C. For longer term storage (> 3 months) it is recommended to store this antibody at -20°C or -70°C.

Applications: Functional Assays

Application Notes: This biosimilar is for research use only (RUO): it is not for diagnostic or therapeutic procedures and cannot be purchased by patients.

Use: Products are for research use only. Not for use in diagnostic or therapeutic procedures.
