

Porgaviximab Biosimilar - Research Grade

Product Code: ICH5780

More Information

Species Reactivity: Human

Target: Zaire Ebola virus GP1

Concentration: 5mg/ml

Isotype: IgG1 - kappa

Host: CHO Cells

product name H2: Porgaviximab Biosimilar - Research Grade

Sequence: <https://www.imgt.org/mAb-DB/>

Buffer: ICH3002

Shipping Conditions: Blue ice

background: A primary target for filovirus neutralization research is the Zaire ebolavirus glycoprotein. This recombinant human IgG1 kappa antibody is an unconjugated, non-therapeutic analog of porgaviximab, produced in CHO cells against Zaire Ebola virus. Supplied for research use only, it is purified to a low-endotoxin standard suitable for in vivo studies and offered in scalable milligram (mg) to gram (g) quantities for high-throughput, heavy-usage laboratories. It functions as a defined reagent for virus-neutralization assays, viral-entry studies, functional characterization, and preclinical filovirus models. The format is optimized for reproducible results across high-volume study designs.

Purification Method: This monoclonal antibody was purified using Protein A

Formulation: Sterile, preservative-free, solution in PBS. BSA and Azide free.

Purity: >90% by SDS-PAGE

2026

Endotoxin: ≤ 1.0 EU/mg as determined by the LAL method

Storage: This biosimilar is stable when stored at 2-8°C. For longer term storage (> 3 months) it is recommended to store this antibody at -20°C or -70°C.

Applications: Functional Assays

Application Notes: This biosimilar is for research use only (RUO): it is not for diagnostic or therapeutic procedures and cannot be purchased by patients.

Use: Products are for research use only. Not for use in diagnostic or therapeutic procedures.

Delivery Time: 3-4 weeks
