

# Tamrintamab Biosimilar - Research Grade

**Product Code:** ICH5898

**More Information**

**Species Reactivity:** Human

**Target:** DPEP3

**Concentration:** 5mg/ml

**Isotype:** IgG1 - kappa

**Host:** CHO Cells

**product name H2:** Tamrintamab Biosimilar - Research Grade

**Sequence:** <https://www.imgt.org/mAb-DB/>

**Buffer:** ICH3002

**UniProt:** Q9H4B8

**Shipping Conditions:** Blue ice

**background:** Dipeptidase 3 (DPEP3) is a cell-surface enzyme expressed in certain germ-cell and ovarian tumors, drawing interest as a tumor-targeting antigen. The reagent here is a non-therapeutic, unconjugated analog of tamrintamab, a recombinant anti-DPEP3 monoclonal antibody for research use only. It is manufactured to in vivo standards in a low-endotoxin format and made in scalable milligram to gram quantities for high-throughput programs. The antibody is useful for DPEP3-binding functional assays, in vitro tumor-cell screening, and in vivo targeting models in oncology research. Lot-to-lot reproducibility and ample availability make it well suited to extended, high-volume research efforts.

**Purification Method:** This monoclonal antibody was purified using Protein A

**Formulation:** Sterile, preservative-free, solution in PBS. BSA and Azide free.

**Purity:** >90% by SDS-PAGE

**Endotoxin:**  $\leq 1.0$  EU/mg as determined by the LAL method

**Storage:** This biosimilar is stable when stored at 2-8°C. For longer term storage (> 3 months) it is recommended to store this antibody at -20°C or -70°C.

**Applications:** Functional Assays

**Application Notes:** This biosimilar is for research use only (RUO): it is not for diagnostic or therapeutic procedures and cannot be purchased by patients.

**Use:** Products are for research use only. Not for use in diagnostic or therapeutic procedures.

**Delivery Time:** 3-4 weeks
