

# Upanovimab Biosimilar - Research Grade

**Product Code:** ICH5958

**More Information**

**Species Reactivity:** Human

**Target:** Severe acute respiratory syndrome coronavirus 2

**Concentration:** 5mg/ml

**Isotype:** IgG1 - kappa

**Host:** CHO Cells

**product name H2:** Upanovimab Biosimilar - Research Grade

**Sequence:** <https://www.imgt.org/mAb-DB/>

**Buffer:** ICH3002

**Shipping Conditions:** Blue ice

**background:** The SARS-CoV-2 spike glycoprotein mediates viral entry and is the principal antigen studied in coronavirus neutralization and vaccine research. This recombinant human IgG1 monoclonal is an unconjugated, non-therapeutic analog of upanovimab directed against SARS-CoV-2 and is offered for research use only (RUO). It is purified to a low-endotoxin standard suitable for in vivo work and prepared in scalable milligram-to-gram batches to support bulk and high-throughput laboratories. The antibody is well suited to virus-neutralization assays, spike-binding studies, positive-control applications, and preclinical infection and immunity models, with no clinical use intended.

**Purification Method:** This monoclonal antibody was purified using Protein A

**Formulation:** Sterile, preservative-free, solution in PBS. BSA and Azide free.

**Purity:** >90% by SDS-PAGE

**Endotoxin:**  $\leq 1.0$  EU/mg as determined by the LAL method

**Storage:** This biosimilar is stable when stored at 2-8°C. For longer term storage (> 3 months) it is recommended to store this antibody at -20°C or -70°C.

**Applications:** Functional Assays

**Application Notes:** This biosimilar is for research use only (RUO): it is not for diagnostic or therapeutic procedures and cannot be purchased by patients.

**Use:** Products are for research use only. Not for use in diagnostic or therapeutic procedures.

**Delivery Time:** 3-4 weeks
