

# Varisacumab Biosimilar - Research Grade

**Product Code:** ICH5969

**More Information**

**Species Reactivity:** Human

**Target:** VEGFA $\alpha$ 1/2

**Concentration:** 5mg/ml

**Isotype:** IgG1 - kappa

**Host:** CHO Cells

**product name H2:** Varisacumab Biosimilar - Research Grade

**Sequence:** <https://www.imgt.org/mAb-DB/>

**Buffer:** ICH3002

**UniProt:** P15692

**Shipping Conditions:** Blue ice

**background:** Vascular endothelial growth factor A (VEGFA) is the principal driver of angiogenesis and a cornerstone target across cancer and vascular disease research. This recombinant human IgG1 monoclonal is an unconjugated, non-therapeutic analog of varisacumab directed against VEGFA and is offered for research use only (RUO). The antibody is purified to a low-endotoxin standard appropriate for in vivo experimentation and manufactured in scalable milligram to gram quantities for bulk and high-throughput laboratories. It serves as a ligand-neutralizing control and active reagent across in vitro angiogenesis assays, VEGF-signaling screens, and preclinical tumor and vascular models.

**Purification Method:** This monoclonal antibody was purified using Protein A

**Formulation:** Sterile, preservative-free, solution in PBS. BSA and Azide free.

**Purity:** >90% by SDS-PAGE

**Endotoxin:**  $\leq 1.0$  EU/mg as determined by the LAL method

**Storage:** This biosimilar is stable when stored at 2-8°C. For longer term storage (> 3 months) it is recommended to store this antibody at -20°C or -70°C.

**Applications:** Functional Assays

**Application Notes:** This biosimilar is for research use only (RUO): it is not for diagnostic or therapeutic procedures and cannot be purchased by patients.

**Use:** Products are for research use only. Not for use in diagnostic or therapeutic procedures.
